

BURIAL AND HEADSTONE INFORMATION

Usually the Man is Buried on the South side and the Woman is Buried on the North side.

People are Buried with their Heads to the West and their Feet to the East.

Following is an example of a headstone lay out if they were buried as above:

This is just the way it is "Normally" done. The Family can request changes to these procedures if they so desire. Also if the graves are along the road often times they will order the headstones in reverse order so they can be read from the road. Again this is a preference for the family to decide on.
